

USE OF CAMERAS OR RECORDING DEVICES BY ALL VISITORS

(1) The use of cameras or other photographic/recording devices inside the Detention Center (also referred to as the “institution”) by visitors is prohibited without the express consent of the Corrections Operations Major (the “Major”) and/or the Major’s designee(s). The Major is authorized to approve camera or recording use on a case-by-case basis when it is determined that it would not be detrimental to the security and order of the institution.

(2) The photographing, video, or audio recording of any part of the institution's physical structure while on property is prohibited, except that:

(a) Media officials shall be allowed to take photographs from areas designated by the Major based on security concerns; and

(b) Officially designated department staff shall be allowed to photograph areas of the physical structure of the institution for investigation, construction or security purposes.

USE OF CAMERAS OR RECORDING DEVICES BY ATTORNEYS

(1) An attorney may bring and use a camera or other device to photograph his/her inmate client if the attorney certifies in writing that the physical condition of the inmate client is relevant to a pending or prospective lawsuit, judicial or quasi-judicial proceeding, or administrative proceeding involving another agency, that he/she needs to photograph the inmate client to preserve evidence of such condition, and that he/she will comply with reasonable security procedures. No inmate shall be photographed without his/her consent. Photographs that might jeopardize security by showing the physical layout of the institution or in any other specific way shall not be permitted.

(2) When an attorney visits an inmate he/she may bring and use a tape recorder or video camera to record the conversation provided he/she agrees to comply with reasonable security procedures, to tape only his/her conversations with the inmate, and provided the inmate consents.

(3) The Major or the Major’s designee(s) shall impose such requirements regarding inspections of cameras and tape recorders and the time, place and manner of their use as may be necessary to preserve institutional security.
